

**BUILD
BETTER**

WALL PANELS

No matter the size of your project, HPM Wall Panels can help you get the job done efficiently. Designed with precision and customized to fit your job's specifications, our Wall Panels can help significantly reduce your production time and wasted materials on the job site.

Expert Design & Customization

- Wall panel layouts created by HPM's Manufacturing Design Team using customized MiTek® software according to building plans and contractor input
- Sheathed or unsheathed, with or without Simpson Strong-Tie® wood construction connectors

Meticulous Manufacturing & Efficiency

- Pre-engineered for convenient setup and locally manufactured with precision lineal saws
- Automated equipment reduces material waste on the construction site by up to 90% (compared to traditional stick-built construction) and ensures consistency
- Quality-inspected by hand and individually labeled for quick identification

Easy Assembly

- Stacked with direction from the contractor and delivered ready to stand up at the job site
- Can reduce construction time by up to 50% compared to traditional construction methods
