

HalePlus® Briefing for Contractors

HalePlus homes are modular, factory-built homes that address the critical need for smaller, affordable housing on Hawaii island. Contractors have a critical role in the HalePlus process. Homeowners will interface and work directly with you for the project with HPM providing the completed HalePlus modules for transport and install. We invite you to this demonstration and briefing before we launch HalePlus homes for public sale.

Open to all licensed contractors and building industry professionals.

Key Highlights:

- Complimentary, in-depth 2-hour session
- Product overview
- Scope of work and opportunities
- Permitting requirements
- Site preparation
- Guidelines and safety measures for transporting and installing
- Hands-on demonstration of modular home transport via crane

Working with HalePlus pre-assembled modules means faster jobsite completion and the ability to help fill an incredible housing gap on Hawai'i Island.

Sessions held on the last Friday of every month.
RSVP at hpmhawaii.com/halepluspros or call Dennis at **731-1313**.

*COVID-19 health and safety protocols will be closely observed.
Space reservation on a first-come, first-served basis.*

Mahalo for your partnership! HPM will be sharing the list of licensed contractors who participate in our demonstration with interested HalePlus homeowners, so they can easily find and connect with contractors like you.
